

Solving Cloud Collections, ECA, and Processing for an Am Law 100 Firm

Summary

See how Casepoint complements an AM Law 100 firm's in-house eDiscovery software delivering powerful cloud collections, ECA, and processing.

What Was the Challenge?

This was another steep one: Casepoint was charged with collecting data from thirteen different custodians and a major cloud-based email system. We then needed to cull and perform ECA and ESI processing with a quick turnaround time and pressured budget.

Secure 'one-click' Authorizations for Most Cloud-based Repositories' Speed-automated Cloud Collections.

Client Profile

- AM Law 100 firm supporting a complex case for a large digital ad tech company

Case Profile

- 1.7TB of data
- Over 6.3M documents
- Tight timescales to collect, cull, and process data from a cloud-based email system

Impact

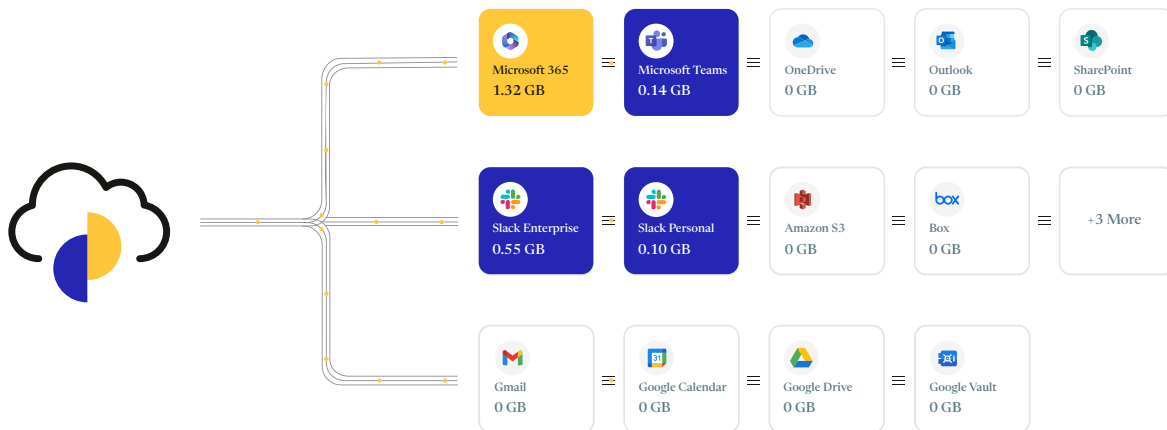

- Secure 'one-click' cloud collection authorization slashed delivery times
- 6.3M documents rapidly culled down to a reviewable 60K
- Review times dramatically expedited and costs cut
- Still working together to deliver great results

How Did Casepoint Deliver?

Casepoint's powerful, innovative, and automated cloud collection capabilities and transparent pricing won the day, delivering what the firm's own legacy systems and other eDiscovery providers couldn't:

- ✦ Sizable amount of disparate data collected from a cloud-based email system without needing individual custodian passwords
- ✦ The initial mammoth 6.3M document set reduced to 1.5M using deDupe, deNIST, keyword, and date range filtering
- ✦ 1.5M documents then intelligently honed to 60K documents using Big Data analytics and ECA
- ✦ These were rapidly processed within days, delivered in the right format, and uploaded to the in-house review platform

Cloud Collection Reports & Dashboard

Note: The 'File Size', 'File Count', and 'Message Count' are the sizes and counts of files and messages before Processing.
