

# Casepoint's Rapid Processing Engine Accelerates Multinational FCPA Matter

## Challenge: Meet Tight Deadlines to Find Substantive Information

Casepoint was selected to handle a very tight, three week turn-around project to reduce 8 TB of data to a meaningful data set. Advanced technologies and review tools were imperative for the review teams to identify and produce relevant data quickly.

## Delivered Early: Full-strength Software & Expert Consultants

Casepoint's intuitive platform, which includes built-in Artificial Intelligence and advanced analytics, was the obvious choice for the client. FCPA matters require legal teams to identify substantive data within large document collections quickly. Casepoint's Artificial Intelligence algorithms accelerate the eDiscovery process, locate crucial documents, and aid business decision-making regarding case direction.

Combined with an expert project team, Casepoint provided a consultative approach to deliver the desired results within the required timeframe.

Casepoint's experts worked closely with the client to identify relevant file types and suggest best practices in using advanced technologies and efficient methodologies to identify target documents.

## Lightning Fast eDiscovery Processing Makes All the Difference

Discover how Casepoint met tight review/ production deadlines to support a multinational FCPA matter, rapidly processing 8 TB of data that included forensic images and email archives.

## Case Profile

- ✦ Global software company
- ✦ **\$2 BN** market cap
- ✦ **3,300+** employees worldwide

## Impact

- ✦ **8 TB** of data processed
- ✦ AI utilized to quickly identify on-point documents
- ✦ **98%** of data culled by leveraging ECA tools
- ✦ "On-the-fly" document translation

The results were two fold: the client identified relevant documents within the required schedule and they benefited from huge costs savings for a project of this size. Processing times were shortened and teams were able to review data the same day. Casepoint's full-featured technology coupled with knowledgeable service delivered expert, efficient, and cost-effective results in this FCPA matter.

## Hear it From The Client

“Casepoint’s analytics and culling tools help me to target potentially responsive information quickly...I was able to cull 98% of our collection volume, and focus our review only on the documents that truly mattered. And with sophisticated ECA tools like conversion mapping, I can target the most important documents at the very start of the case – long before a review team is ever involved.”
