

Casepoint Filestore™

Secure, Scalable, and Cost-Effective Cloud Data Management and Storage

Casepoint Filestore™ is the Key to an Efficient and Scalable Data Management Strategy

The size and scope of eDiscovery, investigative, and compliance matters continues to expand at a relentless pace. Modern organizations need flexible, secure, and cost-effective ways to preserve, manage, stage, and store large amounts of potentially sensitive data.

That's why we built Casepoint Filestore™ — our cloud-based data storage and management solution within Casepoint's secure data discovery platform. Casepoint Filestore™ offers a single location to manage legal compliance and investigative data while providing a transparent and defensible chain of custody, empowering corporate and government entities to save time, improve data security, and eliminate unnecessary spend.

The screenshot displays the Casepoint Filestore interface. At the top, there are five navigation tabs: STORE, STAGE, MANAGE, ORGANIZE, and TRANSFER. Below these is a folder overview for 'FOLDER001' which is 'Active'. The interface includes several key components:

- Navigation and Integration:** A sidebar on the left shows icons for various cloud providers (OneDrive, SharePoint, Box, Google Drive, etc.) and a central 'FILESTORE DASHBOARD'.
- Folder Overview:** A blue bar indicates 'FOLDER001' is 'Active'.
- Summary Metrics:** Three summary cards show:
 - Total Allocated Size (TB): 20
 - Total Used Size (TB): 15
 - Total Files: 250
- Table:** A table titled 'Allotted Size Vs Used Size' with columns: FILE SHARE, TYPE, DESCRIPTION, TOTAL ALLOCATED SIZE, USED SIZE, AVAILABLE SIZE, and CREATED BY.
- Chart:** A bar chart titled 'Available Size Vs Used Size' comparing Used Size (TB) and Available Size (TB) across multiple file shares.

Casepoint Filestore™ Puts You in the Driver's Seat

Store and Organize ESI

Upload and download large amounts of structured and unstructured data in its native format for secure storage and on-demand access.

Seamless Staging and Searching

Easily stage, organize, and search across your stored data. When you're ready, upload selected data into Casepoint eDiscovery for processing and review with just a few clicks.

Golden Copies of Case Data

Conveniently store, preserve, and manage master copies of case data for improved data hygiene and transparency.

Maintained Work Product

Tags, redactions, notes, saved searches, and production settings are all maintained in archived workspaces and can be viewed within Casepoint Filestore™ at any time.

Archives of Dormant Cases

Securely save and access internal investigations, compliance, or litigation matters for later use.

Archives of Closed Cases

Swiftly preserve closed cases based on your organization's needs and data retention policies.

What Makes Casepoint Filestore™ Compelling?

A Single Location to Manage Legal Compliance and Investigative Data

Casepoint Filestore™ provides a straightforward data management strategy through a single, secure, cloud-based location where all of your data lives. As such, it is infinitely scalable to meet the evolving data discovery demands of your organization.

Defensible Chain of Custody

Unlike enterprise network file shares, Casepoint Filestore™ provides complete transparency around the chain of custody. Customers have a full audit of when data arrived and who had access to it throughout its lifecycle.

Stage Your Data Before Processing

Stop staging data on your own servers. Stay organized using Casepoint Filestore™ to store and stage your data in Casepoint's secure platform prior to processing and reviewing.

Lightning-Fast Data Movement

When litigation, investigations, or regulatory response needs arise, move your data from Casepoint Filestore™ to a Casepoint eDiscovery workspace in a flash. There is no need to wait for slow data transfers between disparate systems or outside parties.

Trusted Security

Your data stays within the secure confines of the Casepoint platform, so you never have to worry about the risk of external data transfers or third parties holding onto your data longer than they should.

Native Data Format Support

Forget about file format conversions. Casepoint supports over 600 native data types, so you can save time and headaches by uploading and downloading your data in its native format, always.

Flexible Pricing and Scalability

Say goodbye to lofty upfront costs. Casepoint Filestore™ offers the flexibility to scale with your business. Only pay for additional storage when you need it.

Casepoint Filestore™ Means NO MORE:

✗	No more waiting hours for manual data transfers	✗	No more organizing data on multiple platforms
✗	Struggling to establish chain of custody	✗	No more busting your budget to store collected data
✗	No more risky external data transfers	✗	No more feeling stuck with your current data storage solution

Ready To Take Control of Your Data?

Casepoint Filestore™ is your key to efficient and scalable storage for collected data.
