

State, Local, and Education

For SLED Agencies: One Platform for Every Legal, Records, and Investigative Challenge

Public records, litigation, investigations, and compliance in one secure platform with built-in AI.

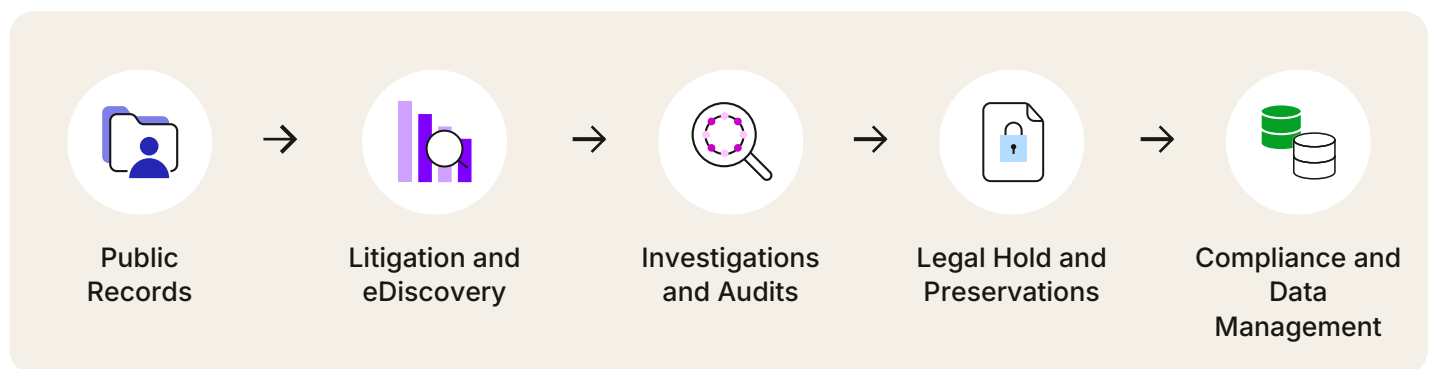

The Requests Keep Growing, But The Teams Don't

Public records deadlines are set by statute. Constituents, the press, and the courts are watching. The same lean team answering public records requests also supports litigation, internal investigations, and audits. The data lives in email, collaboration platforms, and cloud applications, and the tools to search it are scattered or manual. When a request becomes a lawsuit or an investigation, the work starts over in another system, and the legal hold waits in an IT queue.

One Unified Platform for Every Part of the Matter

Casepoint gives agencies, cities, counties, and education institutions one secure platform for public records, eDiscovery, legal hold, investigations, and compliance. Information, workflows, and context remain connected to each matter, reducing manual handoffs and helping teams move from information management to action more efficiently.

Built For the Work You Do Every Day

Public Records

Meet the deadline. Defend the response.

Handle requests from intake and search through review, redaction, production, and reporting, with the audit trail to show your work.

Litigation and eDiscovery

Bring discovery in-house. Run it end to end.

Collect, process, review, analyze, and produce data for litigation involving your agency, city, county, or campus, without fragmented systems or manual workarounds.

Investigations and Audits

Find the facts. Stand behind the outcome.

Keep evidence, case workflows, and audit trails for internal, inspector general, and compliance investigations.

Legal Hold and Preservations

Preserve before it becomes a problem. Don't wait on IT.

Automate holds and track custodians across departments from one place.

Compliance and Data Management

Know what you have. Control who sees it.

Centralize sensitive constituent, student, and employee information with the governance and auditability public-sector organizations require.

Ready to modernize how your agency, county, or campus
handles legal and records work?
