

Process Apple File Types Directly in Casepoint

Avoid extra conversion steps that can slow review, increase costs, and expose sensitive data to unnecessary handoffs.

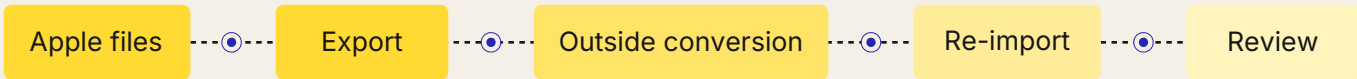

Supported Apple File Types

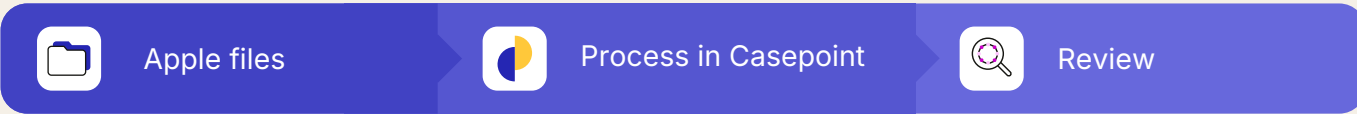

Despite making up roughly **25%** of the market, many eDiscovery processors don't handle Mac data natively.

Typical Workflow

Casepoint Workflow

Faster Review

Skip extra conversion workarounds that can delay time-sensitive matters.

Lower Costs

Limit reliance on separate vendors or manual conversion steps.

Stronger Security

Avoid unnecessary file handoffs and keep more data inside Casepoint's highly secure platform, authorized at FedRAMP® High, DOD IL5, and DOD IL6.

Reduce handoffs, move faster, and keep more of your data inside one secure platform.
