What Do Increased Security Standards Mean for You?

No Additional Cost

Pay the same amount while you benefit from the deep value of Casepoint's modern technology and unparalleled commitment to the highest security standards. No expensive hardware, software, or other resources to manage, allowing you to focus on your agency's core mission.

No Additional Work

The data classification process will determine what level of security is needed, making security authorizations straightforward for your information security teams. Your security level is based on your data security needs.

Your Data Is Secure at All FedRAMP Impact Levels

Low Impact

Handles less sensitive data, where the impact of unauthorized access or loss is limited.

156 Controls

Moderate Impact

Secures more sensitive data that has potentially significant impacts on operations or assets.

323 Controls

High Impact

Protects critical operations and highly sensitive data that could have severe effects on operations, assets, or individuals.

416 Controls

Why Is FedRAMP High a Priority?

Cyber threats are increasing and more data repositories are moving to the high impact level.
