

The Most Trusted eDiscovery Solution For Government

Casepoint is an innovative, scalable, and extensible eDiscovery platform that government agencies trust with their expanding and complex data. Casepoint provides a truly end-to-end solution for the entire discovery process, including legal hold, preservation, data collection, data processing, AI-powered analysis, review, production, and Case Summary.

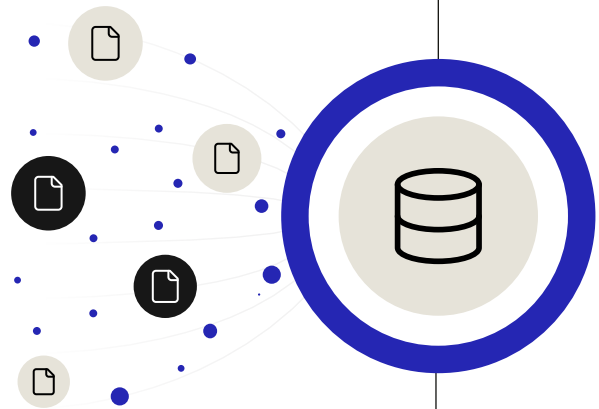

Why Do Government Agencies Trust Casepoint?

- 🌿 We were the first eDiscovery cloud-based platform to achieve FedRAMP High and Moderate Authorization and to achieve StateRAMP Authorization.
- 🌿 We are the only Legal Hold and eDiscovery cloud-based platform to achieve Department of Defense Impact Level 5 and 6 Authority to Operate.
- 🌿 We meet rigorous government security requirements with the support of our dedicated implementation team, customer success team, and user adoption team.
- 🌿 We are 508 compliant

We Host More Mission Critical Data in the Cloud Than Any Other eDiscovery Provider

-  We are contracted to host up to **1.5 petabytes** of data. That equates to around 30 million tall filing cabinets worth of data.
-  We are the first to process over **300 terabytes** of data for any single government agency. That's about 1.6 billion pages of standard printed text.
-  We have migrated over **250 TBs of Government data** into Casepoint from other eDiscovery solutions.

Use Cases Supported by Casepoint's Data Discovery Platform

-  Litigation
-  Investigations
-  Legal Hold
-  FOIA and Public Information Requests
-  Congressional Inquiries
-  Enforcement
-  Examination

We've Built and Refined Our Solution Specifically for Government Workflows

-  We've adapted our solution for the growing number of government use cases, including **litigation, investigations, FOIA requests, Congressional Inquiries, and more.**
-  We have a dedicated team to create **configurable workflows** for government agencies' unique data review needs.
-  We derive over **70% of our product feature updates** directly from user insights, such as redaction enhancements and UI enrichments.

Our Pricing Model is Inclusive and Free of Surprises

- Our flexible pricing model aligns with budget constraints.
- We bundle unlimited user licenses with full features and functionality at one predictable price.
- Our platform is **robust and comprehensive**, which means there's no need for additional applications — advanced features such as AI or analytics are built right into the platform and available on day one.

We Fast-Track the Government Procurement Process

- Casepoint can be procured through GSA MAS Contract No. 47QTCA18D00BZ or through partnered contract vehicles, including Casepoint's value added resellers, Carahsoft and GovPlace.
